

Select data from WEkEO Repository

Open the data viewer of WEkEO at: <https://www.wekeo.eu/data>

Add a layer and apply the filter using 'ODYSSEA'

1. Select: ODYSSEA Global Sea Surface Temperature Gridded Level 4 Daily Multi-Sensor Observations

and add the Sea Surface Foundation temperature (K) to the map

2. Prepare the API request:

Define your settings, like time range, subset extent, variable, press "Show API request". In the API request window press "Copy" and paste this into the Notebook code field.
